What is Digitex?

Digitex (Digital Higher Education Consortium of Texas), formally known as VCT, is a consortium of community and technical colleges in Texas in which certain online courses are shared. If the Brazosport College (BC) schedule **cannot provide the course you need**, we may be able to use Digitex to find an approved online course shared by another community college in Texas.

Note: Some courses offered through Digitex are not approved due to differences in course requirements, content, or instructor credentialing requirements.

Registration

Interested BC students must meet with either a Division Chair or counselor to confirm there is a need to take a course via Digitex. Once approved, an arrangement to meet or contact information will be sent to the Digitex coordinator. The coordinator will provide appropriate information and registration number to student so he/she can officially register here at BC. Registration fees are due at the same time as any other BC course.

Grades and Transcripts

Grades for Digitex courses are posted and transcribed at BC. Due to transmittal time, the grade may be posted at a slightly later period than other BC courses.

Steps for Digitex Students

1. Contact your program Division Chair or one of our BC counselors about interest in taking a Digitex course.
2. Wait to receive contact and registration number from the Digitex coordinator (they will contact you via email once your desire to take a course is known).
3. Take registration number to BC registration desk to complete the registration process.
